

**FD-601 Food Grade Aluminum Complex Grease****Description**

FD-601 Food Grade Grease is an NLGI #2, aluminum complex grease. It is formulated to lubricate plastic gears, journal and anti-friction bearings on both in plant food machinery and mobile equipment, which handles food products. It will withstand the elevated temperatures and will resist the water environment common in most food plants. FD-601 Food Grade Grease meets FDA Regulation 178.3570 and has USDAH-1 approval, both for lubricants with incidental food contact.

**Laboratory Data**

Color	Light Amber
NLGI Grade	2
Odor	Mild
Boiling Point C (F)	393 (740)
Flash Point C (F)	224 (435)
Vapor Pressure at 20 C	<0.1
Vapor Density	<8.0
Solubility in water	Negligible
Viscosity at 40 C, cSt	108.0
Viscosity at 100 C, cSt	12.2

The information given in this leaflet is based on our careful test and working experience. We hope that it will give you a useful guide, but we give no guarantee of success for your work, since the condition of use are beyond our control.
